EDUCATION

Maharaja Agrasen Institute Of Technology

Bachelor of Technology Grade - 8.57/10

Delhi, India

Aug. 2019 – July 2023

EXPERIENCE

Accenture

Packaged App Development Associate

Oct 2023 – present

Mumbai

- Developed and maintained scalable applications for banking and healthcare clients using .NET, SQL, and Azure.
- Built and optimized ETL pipelines using SSIS and Azure Data Factory to process large datasets from diverse sources.
- Worked with Azure Synapse and Databricks for data transformation and preparation of AI/ML-ready datasets.
- Collaborated with cross-functional teams, contributing to system design, data-driven features, and team learning sessions on ML experimentation.
- Gained hands-on experience with statistical modeling and experimentation techniques through team learning sessions.

PROJECTS

Stock Market ETL + Dashboard | *Azure Data Factory, Databricks, ADLS Gen2, Power BI* **SOURCE CODE**

- Designed a scalable data pipeline using Medallion Architecture (Bronze, Silver, Gold) to fetch and process real-time stock data from multiple symbols.
- Used ADF to ingest data into ADLS, Databricks to clean and structure data, and Synapse to model fact and dimension tables.
- Built a Power BI dashboard to visualize stock trends with line charts, bar charts, KPIs, and slicers, using direct integration with Azure Data Lake.

Used Car Price Prediction | *Python, Pandas, Scikit-learn, Machine Learning*

SOURCE CODE

- Built a regression model to predict used car prices using features like company, model, year, and fuel type.
- Performed data cleaning, EDA, and feature engineering to improve prediction accuracy.
- Achieved an R^2 score of 0.92 using Linear Regression and evaluated performance with cross-validation.

IPL 2023 BEST 11 | *Data Analysis, Python, Pandas, Power Bi, MS Excel, DAX*

SOURCE CODE

- Tournament Performance Dashboard: Developed a tournament performance dashboard for player analysis and selection.
- User-Friendly Player Analysis: Implemented a user-friendly interface for switching between player analysis and final 11 player selection. Conducted comprehensive player analysis across five distinct categories, including openers and bow
- Data Management and Processing: Utilized **BeautifulSoup** library in Python for efficient data collection and **web scraping**. Employed **Pandas** and **Power Query** for data cleaning and transformation, ensuring data accuracy and consistency.

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate

Microsoft Certified: Azure Fundamentals

Deep Learning Speciliaztion

Microsoft Certified: Azure Data Fundamentals

TECHNICAL SKILLS

Languages: Python, C Sharp, SQL, HTML/CSS

Hard Skills: Web Scrapping, Data Analysis, Data Visualization, Machine Learning

Tools: Git, Angular, MS Power BI, Aure Data Factory, Synapse Analytics, DataBricks, Azure

Libraries: pandas, NumPy, Matplotlib, Spark, Scikit-Learn, TesnsorFlow
